

ProAssure Asset IQ

in partnership with Saratella LLC

ENTERPRISE ASSET · INVENTORY · CMMS

One platform for the entire asset lifecycle.

Acquisition → allocation → depreciation → disposal — with preventive maintenance, spares, AMC contracts and reliability analytics, unified in one secure modern system.

Reactive operations quietly drain your budget

Unplanned downtime

Critical assets fail without warning. Every hour of downtime is lost output and emergency cost.

Fire-fighting maintenance

Fixing after failure costs far more than preventing it — and shortens asset life.

Disconnected data

Assets, spares and work history sit in scattered spreadsheets that nobody trusts.

No accountability

No approval trail, no audit log — compliance becomes a scramble at audit time.

THE SOLUTION

Meet ProAssure ProAssure Asset IQ

ProAssure ProAssure Asset IQ connects assets, maintenance, inventory and contracts into a single system of record — so every asset is tracked end-to-end, every job is planned before it's urgent, and every action is approved and audited.

Assets

Maintenance

Inventory

AMC

Analytics

Governance

Everything an asset needs, in one place

Asset Lifecycle

Register, allocate, depreciate (SLM/WDV) & dispose with gain/loss.

Maintenance / CMMS

Preventive & corrective work orders, checklists, spares, downtime.

Inventory & Spares

Stores, stock ledger, goods receipt, issues, transfers, low-stock alerts.

AMC Contracts

Coverage, SLAs, PM visits and automatic expiry/renewal reminders.

Reliability Analytics

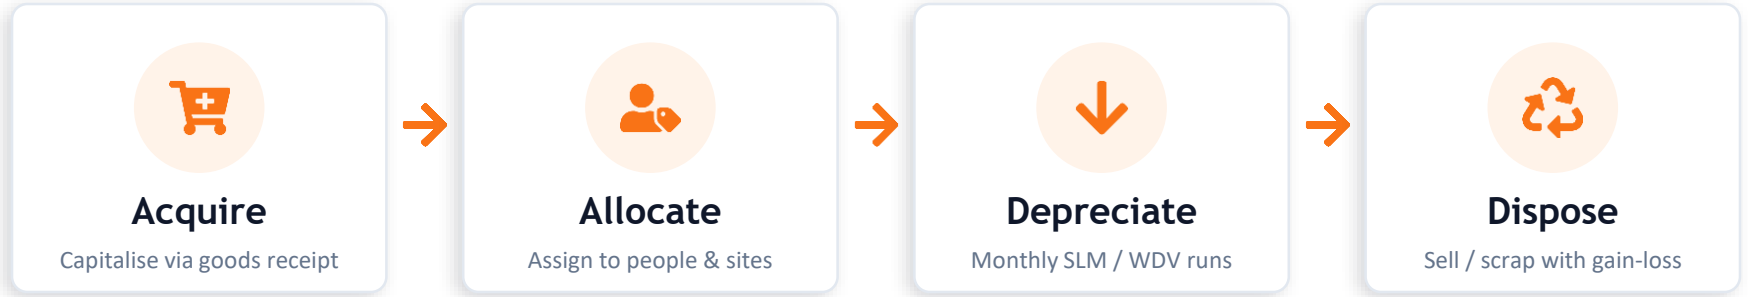

MTBF, MTTR, availability, cost trends and depreciation forecast.

Governance & Control

Configurable approvals, role-based access and a full audit trail.

Track every asset from cradle to disposal

- **360° register** every cost, warranty, meter and movement on one screen.

Straight-line & reducing-balance depreciation with live net-book-value.

QR labels scan an asset to pull up its full history in the field.

Plan maintenance before it becomes urgent

Preventive schedules

Time- and meter-based PM that auto-generates work orders when due.

Corrective work orders

Status workflow, task checklists, labour, downtime and root cause.

Spares consumption

Issue parts straight from stores against a work order — cost rolls up.

AMC-linked jobs

Route vendor visits under the right contract and SLA.

WORK ORDER LIFECYCLE

Open

Assigned

In Progress

Completed

Closed

Spares under control, assets born from receipts

Multi-store stock

Real-time balances and a full movement ledger across every store.

Receipts mint assets

Goods receipt creates one tagged, depreciable asset per unit automatically.

Issue against work orders

Deduct spares to a job; cost flows into the work-order total.

Adjustments & transfers

Reconcile counts and move stock between stores with an audit trail.

Low-stock alerts

The scheduler flags items below reorder level before they run out.

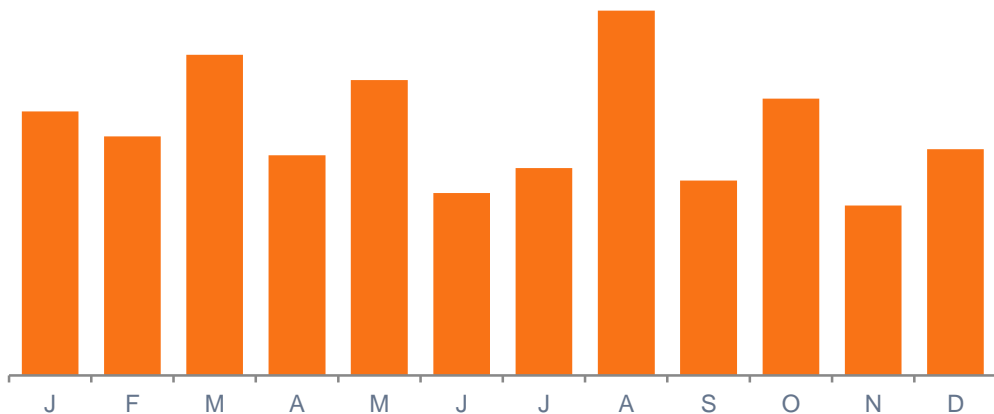

Valued inventory

Average-cost valuation feeds reporting and asset capitalisation.

See the reliability you couldn't before

Maintenance cost — last 12 months

Illustrative — drawn live from your work-order data.

99.2%

Fleet availability

8.5 h

Mean time to repair

100%

PM compliance

NBV

6-month depreciation forecast

Approvals and audit, built in – not bolted on

Configurable approvals

Multi-level sign-off by amount, site, category — with rules you control.

Role-based access

A permission matrix per module: view, create, edit, delete, approve, export.

Full audit trail

Every create, edit and approval is logged, filterable and exportable.

Secure by default

CSRF protection, account lockout and server-side validation throughout.

THE PAYOFF

What changes with ProAssure ProAssure Asset IQ

Higher uptime

Catch failures early with preventive, condition- and meter-based maintenance.

Lower cost

Shift spend from emergency repairs to planned work and controlled spares.

Longer asset life

Consistent upkeep and accurate depreciation extend useful life and ROI.

Audit-ready

Approvals and a complete trail turn compliance from a scramble into a click.

Why teams choose AssetIQ

One system — not three.

Assets, maintenance, inventory and contracts in a single source of truth.

Your rules. Zero code.

Configure approvals, roles and workflows yourself — in minutes, not sprints.

Insight from day one.

Reliability and cost analytics built in — not a six-month BI project.

A partner, not a portal.

Designed, deployed and supported by the Sprinter team — we stay in the loop.
