GST-READY INVOICING FOR INDIAN SMBS

Invoice smarter. File faster. Get paid sooner.

From quote to receipt — invoices, recurring billing, expense reimbursements, account ledgers and GST returns in one connected platform.

Free forever

India GST / TDS ready

Hosted in India

www.sprinter.co.in

THE CHALLENGE

SMBs run their books on spreadsheets and stress

Spreadsheet sprawl

Invoices, expenses and bank reconciliations across five disconnected files.

GST is genuinely hard

CGST / SGST / IGST splits, FY-aware numbering, 3B returns due monthly.

Reimbursements drag on

No history, no partial payments, no audit trail when finance pushes back.

Existing tools are pricey

₹1,500–₹3,000 / user / month for what should be commodity software.

The hidden tax on growth

Every late invoice, missed ITC, or unreconciled bank line is unpaid work — and unpaid taxes you can't reclaim.

Slow cycles

Lost ITC

Audit risk

OUR ANSWER

One platform. Every SMB workflow. Free

Sofia consolidates invoicing, vendor bills, expense reimbursements, account ledgers and reports into a single web app — built specifically for the Indian GST regime, and provided free of charge.

- ✓ GST-aware invoice numbering that resets per financial year
- ✓ CGST / SGST / IGST auto-inferred from GSTIN state codes
- ✓ Recurring masters with auto-generation, partial payments and history
- ✓ Per-claim reimbursement settlement trails for full auditability
- ✓ Bank, cash, transfer and cash-deposit ledgers in one place

Free forever

No subscription, no per-seat fee, no usage caps — and no ads or AI-training on your data.

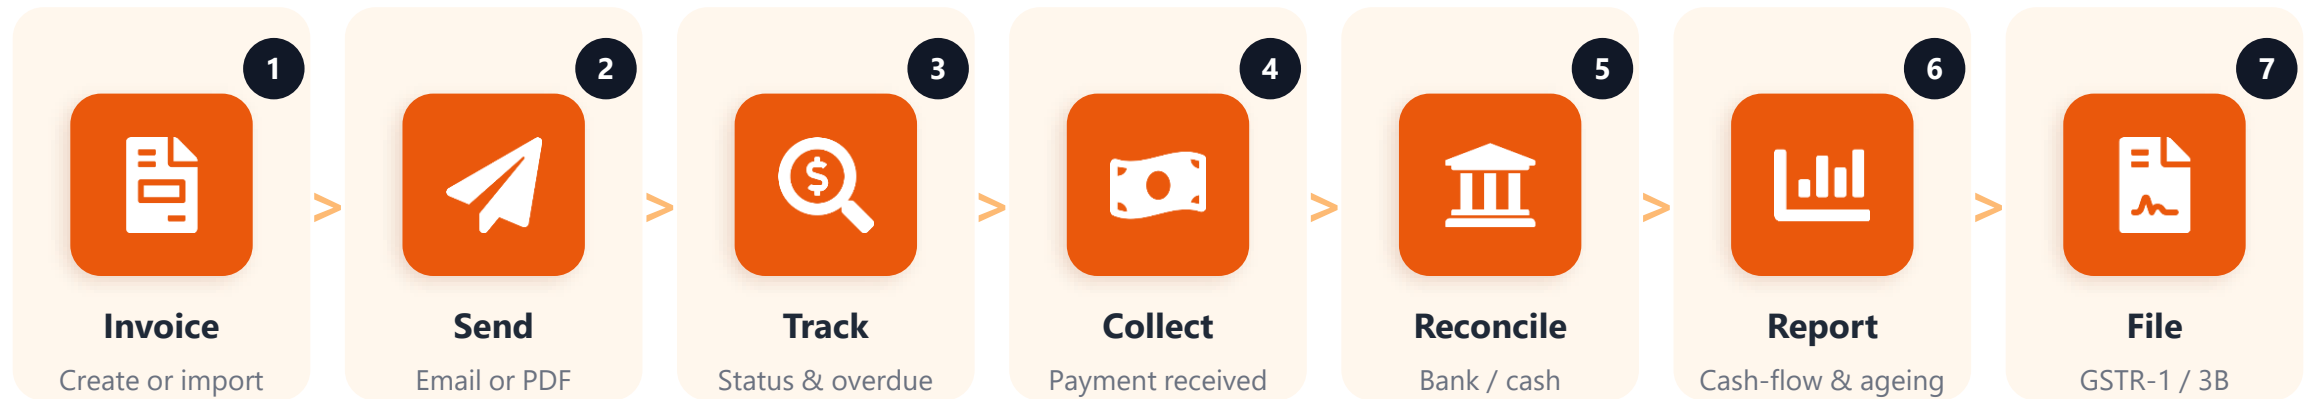

No card

No trial

No limits

HOW IT WORKS

The full invoice-to-payment lifecycle

Every step links end-to-end — invoice → payment → bank → GST return — without re-keying.

BUILT FOR EVERYONE WHO TOUCHES MONEY

One platform, value for every role

Founder & Admin

- ✓ Cash position at a glance
- ✓ FY-aware invoice numbering
- ✓ Multi-user roles & permissions

Finance & AP

- ✓ GST splits computed automatically
- ✓ OCR-based vendor bill capture
- ✓ Bank, cash & cheque reconciliation

Team & Requesters

- ✓ Submit a reimbursement in seconds
- ✓ Track approval & settlement
- ✓ See your own dashboard, not the firm's

COMMAND CENTRE

Your business pulse at a glance

An admin dashboard built around the questions you actually ask — what's overdue, what's owed, where the cash is, and what GST you owe this month.

- ✓ 4 KPI cards with 30-day sparklines and trend %
- ✓ Action Needed panel with severity-coloured alerts
- ✓ AR/AP ageing, top debtors & creditors, GST snapshot
- ✓ Recent activity feed across invoices, bills and payments
- ✓ FY / period selector + global Ctrl+K command palette

3 invoices overdue · 2 vendor bills due this week

Tax invoices in 30 seconds

Generate compliant Indian tax invoices without dropping into a spreadsheet. Auto-numbering, GST splits and HSN lookup are all baked in.

- ✓ Auto-numbered per company prefix and Indian FY (INV/0042/26-27)
- ✓ CGST/SGST/IGST auto-inferred from GSTIN state codes
- ✓ HSN/SAC autocomplete with default GST rates
- ✓ Recurring masters: auto-generate, partial payments, history
- ✓ A4 PDF with watermarks, page numbers, and one-click print

Invoice cleanly, file confidently

Every invoice you raise rolls into the GST workings — no manual journal at month-end.

Auto GST

FY reset

A4 PDF

Capture vendor bills without typing

Drag in a PDF or scan and Sofia extracts vendor, invoice number, date, totals, CGST/SGST/IGST — then keeps the source file attached to the bill for audit.

- ✓ OCR engine handles printed and scanned bills (Tesseract + pdfplumber)
- ✓ Side-by-side document preview + pre-filled form to review
- ✓ Source file auto-attached for the auditor's trail
- ✓ Vendor KPIs: total spend, outstanding, avg days to pay
- ✓ Bulk vendor payments across multiple bills in one click

Vendor bills. No data entry.

Snap, verify, post. ITC tracked correctly the first time, every time.

OCR

ITC-ready

Bulk pay

Multi-payment, fully auditable

A reimbursement workflow finance and the team both trust. Submit, approve, settle — with partial payments and a per-claim payment trail.

- ✓ Employees submit, admins approve / settle
- ✓ Partial payments accumulate — ₹500 today, ₹500 next week
- ✓ Bulk Settle: pick claims with checkboxes, edit each amount
- ✓ Per-claim history: date, mode, account, reference, audit-ready
- ✓ Posts to bank or cash account automatically — no JV needed

Pay the team on a schedule that works.

Cash flow rarely lines up with the team's expectations. Sofia handles partials so neither side is surprised.

Partial pay

Bulk settle

Audit-ready

Your money map — bank, cash, transfers

A clean ledger of every rupee in and out, with transfers between accounts and cash-deposit / cash-withdrawal workflows wired in.

- ✓ Multiple bank accounts + cash boxes, balances live
- ✓ Transfer wizard: account ↔ account, deposit, withdrawal
- ✓ Account statement with date-range presets (Month / FY / Custom)
- ✓ Live Credits / Debits / Net running totals at the top
- ✓ Click any transaction to jump to the source invoice or claim

Reconciliation without the spreadsheet.

Receipts post to the customer invoice. Payments to the vendor bill. Transfers stay matched.

Bank + cash

Transfers

Statements

Control, compliance & audit by design

Full audit trail

Every action logged, login to logout.

Role-based access

People see and do only what their role allows.

Approval matrices

Multi-level, value-based sign-off rules.

Real-time alerts

Live notifications for actions & approvals.

Document trace

Follow any item across every module.

Policy enforcement

Budgets and rules applied automatically.

BUILT FOR DAILY USE

Small details, every day

Command palette

Ctrl + K jumps to any client, vendor or invoice.

GSTIN validation

Regex + 36-state check + copy button.

IFSC autolookup

Razorpay API auto-fills bank and branch.

Sidebar badges

Live overdue and pending counts on nav items.

Modal-driven UX

No native browser confirm or alert anywhere.

Forgot password

Tokenised reset emails via GoDaddy SMTP.

Modern, lightweight, India-hosted

Backend

- ✓ Python 3 · Flask · Flask-Login
- ✓ MySQL with 50+ stored procedures
- ✓ Werkzeug PBKDF2 password hashing
- ✓ pdfplumber + Tesseract for OCR
- ✓ smtplib (GoDaddy SMTP) for transactional mail

Frontend

- ✓ Tailwind CSS (CDN) · Alpine.js 3
- ✓ ApexCharts for KPI visualisations
- ✓ html2pdf.js + native CSS Paged Media
- ✓ ionicons + Inter font
- ✓ Razorpay IFSC API for bank auto-fill

SECURITY & PRIVACY

Free, but never your data

No selling, no advertising, no AI training on your data.

Hosted in India — GST-aware data residency.

PBKDF2 password hashes; SHA-256 one-time reset tokens.

HttpOnly, SameSite-Lax session cookies.

Plain-English Terms & Privacy Policy in the app.

Your data, your business

We're a tools company, not an ad company.
Your invoices, clients and bank data belong to you — never resold, never repurposed.

GDPR-aware

India-hosted
